Saeed: Ok, ok, let's go.

Spaceman: You have to listen to all my instructions to return back safely to the earth.

Saeed: The view is wonderful from here, I can see the Earth it's very small.

Spaceman: Yes, let me make a satellite call with planetary, to tell them about our arrival.

Saeed: How much time we want until we reach?

Spaceman: An hour after we are out of the Milky frankincense (your Galaxy).

Saeed: Ok, I will take some photos by my phone.

Spaceman calling his plants where he will land and Saeed is taking photos by his phone.

Spaceman: Saeed look over there, this is the satellites which the human put it around the earth.

Saeed: Yes I've studied, it facilitates sending satellite and communications around the Earth.

Spaceman: You are in the grace of the planet, you have air, agriculture, water and everything, but we live in a space craft.

Saeed: Live in space craft! Why?

Spaceman: Because our parents did not care about our planet, it became not fit for the life on it, which forces us to live in a space craft.

Saeed: This is very difficult.

Spaceman: Yes, you will see when you reach to the planet, In spite of that.....

Spaceman: Saeed we will get into the black spot and this will take us quickly to our galaxy, this black spot is not known to inhabitants of the earth with you that's why they are not able to visit us.

Saeed: That's mean I will be the first human from the earth come to visit your planet.

Spaceman: Yes Saeed, hold good the vehicle vibrating heavily tremendous speed.

Saeed: Ok, I follow your instructions, you are now commander of the spacecraft.

Spaceman: Here we enter into the black spot through which the spacecraft travels from galaxy to galaxy by Altaban man space.

Spaceman: Saeed, we are entering our galaxy and now I'm in touch with our space vehicle so I can contact with the main vehicle.

Saeed: What this language spoken by the device? I don't understand anything.

Spaceman: Yes this our language, different from your language on earth.

Saeed: I will try to learn it.

Spaceman: Saeed, wait they allowed us to docking with the main ship.

Saeed: Very nice.

Spaceman: Come on Saeed, let's come down to our main vehicle, let me help you.

Spaceman: Deign Saeed this is my room, I sit here and look and work.

Saeed: This student desk, there is no computer on it, no paper, nothing.

Spaceman: Yes we are not using paper, see I will press on this button and the screen appears on the wall, here I just talk to her and it will write what I want and implement the orders.

Saeed: Wonderful, I mean I do not need to write on paper, only by talk, let me try.

Spaceman: Wait, I will give command to change the language to Arabic language, so it can understand you.

Saeed: Ok, I am Saeed from earth planet, I want to see your planet, can you show me some pictures?

Device responds to Saeed, welcome Saeed on our planet, I will project some pictures now on the wall.

Saeed: What's this pictures? They are all satellite for boats there are no trees, no rivers, no buildings and streets all boats satellite.

Spaceman: Yes Saeed we were living on a sweetest planet in our galaxy but unfortunately we did not care about the planet and we only care about new inventions and factories, so we have become as you can see all boats, our land has become barren until the atmosphere has disappeared due to factory emissions.

Saeed: Thank God, we are till now on our land, we have trees, rivers and our land is nice.

Spaceman: But we are watching the earth, unfortunately we see that you do not care much about your environment.

Saeed: When I go back to the earth I will take care too much for the environment in which we live.

Spaceman: Yes I hope so as not to become like us, come Saeed I want to introduce you to my colleagues.

Saeed: Let's go.

Spaceman taking Saeed to introduce him to his colleagues and explain to them that Saeed is infected with polio and on the earth he can't walk and here one of the spacemen say I have an idea, I will make a light suit working by a device makes him moves and walks, he starts taking Saeed sizes.

Spaceman: I hope Saeed when you go back to the earth I walk with you to show me that the more you have, my friend.

Saeed: I am so happy, you are my dear friend, I will walk.

Spaceman: Come on Saeed, to show the rest of the spacecraft.

Saeed: Something strange, grains changed very fast to food!

Spaceman: Deign Saeed.

Saeed: Ok I will eat, but I want to wash my hands before eating.

Spaceman: Take this Saeed and put it in your hand and I promise you that your hand will be clean.

Saeed: Grains also! Everything you have are grains, Ha Ha Ha Ha.

Spaceman: Yes grains, Ha Ha Ha Ha.

After they finish the food they went to complete the round on spacecraft.

Spaceman: Saeed it's time to go back to the earth.

Saeed: This fast?

Spaceman: If you will not go now, the black spot will close and it will not open before 4 days that's why you have to hurry to go back to the earth.

Saeed: Ok, let's go you are the leader.

Spaceman: Before we go, my colleagues brought a gift for you.

Saeed: Gift!

Spaceman: Yes, here they are coming with a gift, it's the suit that promises by my colleague to be able for you to walk on the earth and this is a wheelchair.

Saeed: Yes I can see a chair, but it does not have wheels, how it will move?

Spaceman: It works the same idea of our car on the air, it pumped air and rises from the ground a distance of 20cm and it moves easily.

Saeed: This for me? I thank you with all my heart, I became very happy.

Spaceman: Your name originally is meaning happy Saeed, Ha Ha Ha Ha.

Saeed: Ha Ha Ha Ha.

After taking his gift Saeed say good bye to spaceman colleagues and both of them move to the small spacecraft and the door close and separated from the main space vehicle and the space vehicle is moving in space.

Saeed: Yes, I remember your previous orders the vehicle will be shaken dramatically, yes, yes.

Spaceman: Here we are entering the black spot.

And the spaceship entering the black spot and it moves to the Galaxy by Altaban and revolves around the earth and go back to where it began from Al Thiqah Playground for Handicap, and the door open for Saeed and spaceman to come down to the earth.

Saeed: I feel I am heavy.

Spaceman: Yes Saeed, because the Earth gravity.

Saeed: Is the chair you give it a gift for me will work here?

Spaceman: Yes sure, but you must charge it with electricity.

Saeed: I will try it now, see I rose from the ground, chair works.

Spaceman: Yes Twenty- centimeter will rise from the earth do not be afraid.

Saeed: I have learned a lot from this trip, thank you.

Spaceman: What did you learn Saeed?

Saeed: I learned first: We should thank God for the blessings that gave us always.

second: To maintain these blessings, that preserve the environment and not throw away remnants in the desert, And that we must work good and thank God for what we have .

Spaceman: You are right.

Spaceman: Saeed, you remember when we began to fly over the club we saw University City, Can you take me to visit?

Saeed: Of course, but not today, I want to go home to charge the flying chair to be easy for me to move.
